

a8⁺ Label Printer – The Extra Broad.

Made in Germany.

Technical details.

Label printer A8+

1 Big graphic display

White backlight for optimum readability.

2 Ribbon holder

Three-part tightening axles enable quick and easy ribbon exchange.

3 Straightforward adjustment

The printhead is pressed down with two sliding toggles. One is mounted to the left label margin, the other is pushed to the right label margin.

4 Peripheral connection

Add-on modules such as cutters, external rewinders, present sensors and applicators are easy to connect via the USB peripheral interface. All peripherals are connected to the printer in seconds using two pins and fixed in place with a screw.

5 Solid metal housing

Made of die-cast aluminum. All components are mounted on it.

6 Roll holder

Available for core diameters from 38 mm. (We provide adapters for core diameters wider than 76 mm for improved label winding). The spring-mounted margin stop ensures constant tension during feeding, thus ensuring a highly precise imprint.

7 Only one tool for all maintenance tasks

For exchanging wear parts and connecting peripherals, the Allen key is located ready to hand at the printer.

All required interfaces.

- 1 RS232C interface.
- 2 USB 2.0 slave interface.
- 3 Ethernet 10/100 Base T interface with TCP/IP.
- 4 Slot for wireless LAN card.
- 5 Two USB master interfaces for connecting an external operation panel, keyboard, scanner or service key.
- 6 Slot for CompactFlash Type I memory card.

Options

- 
 › Centronics bi-directional interface acc. to IEEE 1284.
 RS422 / RS485 interface 1,200 up to 230,400 Baud / 8 Bit.
 The interfaces are plugged into the PC.
 Connection to the printer via mini USB connection cable.
- 
 › Label selection – I/O box.
 Up to 16 different labels can be loaded via PLC from a memory card. Operation of four inputs / outputs via Basic Interpreter.
- 
 › cab WLAN card 802.11 b/g.

Stand-alone operation.

Printing with a cab printer without a PC.

The layout of the labels is created either using label software or through direct programming via a text editor on the PC. Label formats, fonts and graphic data, serial data and database contents are saved or imported on the CF memory card, USB flash drive or the internal IFFS printer memory.

Only variable data is sent to the printer via keyboard or host computer before being printed out. Data from a barcode scanner or a balance can also be received by the printer.

Accessories for stand-alone operation

Memory card

CompactFlash Type I

Compact keyboard

Connection: USB, number of keys: 86
 L x W mm: 282 x 132
 Cherry G84-4100

Device functionality and compliance with CE standards are only warranted by using the accessories provided or recommended by cab.

Software tools.

Direct programming with J-Script

The printer language is easy to understand and simple to integrate into your host system. Variable data is linked with host applications. Label design, graphic data and fonts are recorded on the CompactFlash card. The host computer sends only variable data to the printer.

Integration into SAP R/3*

In cooperation with SAP, cab developed the "replace method" for controlling cab printers quickly and easily from SAP R/3 using SAPScript. As a Silver Level partner in SAP's Printer Vendor Program, cab has access to the SAP development area for optimum printer support in SAP environments.

* SAP and R/3 are registered trademarks of SAP AG.

abc – Basic Compiler

As an integrated element of the firmware, the Basic Compiler enables the printer to process data via BASIC programming before it is sent for print editing. This makes it possible for external printer languages to be replaced or data from other systems, e.g. a PLC or balance, to be transferred so information can be printed in different label formats.

Example of use:

Connection to a balance

Database Connector

In stand-alone mode with additional network connection, the Database Connector enables stand-alone printers to access data directly from a central SQL-compatible database and to print it as a label. Data can also be written back to the database or changed during the printing process.

Printer monitoring with Intranet and Internet

Using standard programs such as the web browser or FTP clients, the integrated HTTP and FTP server enables print monitoring, configuration, firmware updates and memory card administration. Status, warning and error messages are sent to administrators or users as e-mails or SNMP datagrams via SNMP and SMTP clients. A time server is used to synchronize the time and date.

Administration Network Manager

The cab Network Manager enables the user to control multiple printers across a network simultaneously. It supports monitoring, configuration, firmware updates, memory card administration, file synchronization and PIN administration centrally.

Printer driver.

WHQL-certified Windows printer driver for

Windows 2000 Windows Server 2003 Windows 7
 Windows XP Windows Server 2008
 Windows Vista Windows Server 2008 R2

Our printer drivers are officially certified and signed by Microsoft. They ensure optimum stability on your Windows operating system. The programs Word, Excel, Access, Corel Draw, etc. can be used to design and print labels.

Apple-Mac OS X® driver

Alternatively, cab offers a CUPS-based printer driver for Mac OS X.

Linux driver

Alternatively, cab offers a CUPS-based printer driver for Linux.

Label software.

cablabel R2+

A powerful label software that is available free of charge and specially designed for cab printers and print & apply systems.

Different fonts, barcodes and graphics in variable heights, widths and printing directions can be used to produce the best possible label design.

In addition to the loadable TrueType fonts available with MS Windows, cab printers also offer a large number of internal bitmap and vector fonts. Thanks to the support of the most commonly used codepages, country-specific special characters can also be printed.

High-performance functions make it possible to design and print even complex labels in just a few minutes. cablabel R2+ supports special functions of the cab printers, such as real-time clock, printer counter, stand-alone operation without PC, circular fonts or the printout of the printer data stream in a file. The MDI technology makes it possible to open several labels at the same time and to move objects from one label to another.

cablabel R2+ is available in 24 different languages for the following operating systems:

Windows XP Windows Server 2003*
 Windows Vista Windows Server 2008*
 Windows 7 * Terminalserver / Citrix are not supported.

Additional label software

Highest possible variability – other commercially available label software solutions, such as Codesoft, Nicelabel, Easylab, Bartender, Label Matrix or Labelview, support the cab label printers and labeling systems. More information is available on our website.

ER1/2/3 external rewinder for direct printer connection

The rewinder is screwed directly onto the printer. Labels can be wound either inside or outside. Electronic control of the swing arm ensures smooth and tight winding.

ER4/6/8 external rewinder with built-in power supply

The rewinder can be attached to almost any third-party printer. All other technical data is the same as for the rewinder ER1/2/3.

EU4/6/8 external unwinder

It enables smooth label feed for heavy rolls. The unwinder works both with inside and outside wound labels.

External panel

If the panel is no longer accessible, e.g. after installation within a facility, an external panel can be installed. There are additional slots for a CF memory card Type I and a USB master interface.

PS7 pause adapter for basic and dispensing devices

The print job is stopped by the pause signal.
The label being printed is finished first, e.g. by using a label loop.
Inputs: Pause, external error
Outputs: No print job, printer not ready, print job active

All examples for accessories are pictured with the thermal label printer A4⁺.
